Back Up Camera

## BASIC SPEAKER UPGRADE

\$900

This speaker upgrade package works perfectly with either the basic or premium Tesla sound systems. Replace and upgrade the factory 4" front speakers with Focal 5.25" Polyglass VR 2-Way Coaxial speakers. These speakers have 120 watts of peak power handling and offer a 75hz to 20Khz Frequency Response.

Replace and upgrade the factory rear 4" speakers with Focal 4"

## AUDIOPHILE SOUND SYSTEM

\$8,000

For superior sound quality Focal hand made component 6.5" and tweeter speakers were custom installed in the doors. Choose from a variety of German leather, Alcantara suede and your choice of stitching thread to custom recreate your door panels.

For bass a 10" subwoofer in a custom fiberglass enclosure is installed in the passenger footwell area. Minimal legroom

is compromised.

Alpine PDX series 600 watt amplifier powers the system. A 153 band EQ processor is installed for accurate tuning and time alignment of each speaker.

System is powered by an independent 12 volt recyclable battery & interfaced with a 110 volt inverter. Charging is required.

\*If Bespoke interior package is purchased the factory front and rear speakers will be removed and the holes will be filled to create superior appearance\*

## TICKET AVOIDANCE SYSTEM

\$2,500

### Radar Detector

- » Avoid speeding tickets
- » Full 360 degree protection
- » Audible and visual warning indicators
- » Laser detection/shifting
- » A custom-disguised installation

## BESPOKE INTERIOR DESIGN

\$7,000

Choose from a wide range of German leather colors, Alcantara suede and extra thick stitching to custom create your own individual interior.

Starting with the dash the upper portion can be Alcantara suede and the lower portion in leather. Any color stitching will be used to separate the two sections which also creates a nice design element.

All the instrument dash gauges are custom painted in a high gloss black finish or can be painted to match the exterior of your car paint.

The door panels are recovered in your choice of leather color and stitching. The door panel insert can be recreated in Alcantara suede or leather with a diamond quilted pattern.

Custom design your seats with a variety of leather, Alcantara and stitching colors to choose from. Seat inserts can be perforated and the head rest section can be embroidered with your monogram. Additional cushion is applied in the seats for a more comfortable feel.

The rear shelf/wall is completely reupholstered in Alcantara suede or leather. Diamond quilted stitching can be applied.
